Empowering Women in Tech with AI Training at a **Leading Financial Institution**

Challenge:

A prominent financial institution's Women in Technology (WiT) program focuses on empowering female employees through career development and skill-building opportunities. To equip 100 WiT members with knowledge of Artificial Intelligence (AI), the organization sought a training partner.

Solution:

Koenig Solutions collaborated with the financial institution to deliver a customized AI-900 Bootcamp program.

Collaboration and Customization:

- Leveraging Koenig Solutions' expertise, a tailored course outline was developed specifically catering to the WiT group.
- To manage registrations efficiently, a dedicated landing page was created to facilitate a smooth enrollment process for the 100 participants.
- Recognizing the need for a flexible schedule, Koenig Solutions designed weekly 1.5-hour sessions spread over five weeks. This catered to the busy schedules of WiT members.
- **Additional support was provided:**
  - Dedicated exam preparation and Q&A sessions to enhance learning outcomes.
  - Solutions for individual participants who faced technical challenges due to security restrictions.

Results:

- **Enhanced AI Knowledge:** WiT members gained a solid understanding of AI concepts and their practical applications, empowering them to leverage AI in their daily work.
- **Positive Feedback:** The training program was met with high satisfaction from participants, exceeding their expectations.
- **Expanding Partnership:** The successful collaboration led to the institution expressing interest in future training sessions for members who missed out and additional training initiatives for different departments.

Client Testimonial:

"All went well! Damini is very patient and clear in all her communications. The way she explained the concepts is very helpful for beginners. She took the time to answer all the questions. All in all, Damini is an excellent instructor." - **Employee**
